

Chapter 3

p.92 For additional labeling, replace Fig. 3.10 with revised figure.

p.93 At the beginning of the section having the header Prime Implicants, insert the following paragraph:

The product terms of a sum of products expression of a Boolean function are called *implicants* of the function because it has the value 1 when an implicant is 1. The condition that an implicant is 1 implies that the function is 1.

p. 93 In Practice Exercise 3.5, change the answer to the following

$$\textbf{Answer: } F(w, x, y, z) = x'y' + x'z + w$$

p. 94 3LT Change "Fig. 3.11" to "Fig. 3.11a"

p. 95 In Practice Exercise 3.7 change the answer to the following:

$$\textbf{Answer: } x'y', xz, xy, w'x, w'z', yz'$$

p. 109 In the bottom circuit in the figure in Practice Exercise 3.11 replace the label $(w'x \ wx')'$ with the label $(w'x + wx')$.

p. 121 10LB Change net list to netlist.

p. 124 8LT Change "// | is logical" to "// || is the logical" .

p. 124 9LT Change "// & is the logical" to "// && is the logical".

p. 125 6LB Change the text "**Answer:** assign Y" to the text **Answer: assign Y**"

p. 128 4LT Delete semicolon.

p. 136 20, 21, 22LT Replace the text with the following:

G1: and2_gate	port map (B => B, w1 => w1, A => A);
G2: inv_gate	port map (B => E, A => C);
G3: or2_gate	port map (A => w1, B => E, w1 => D);
